ETX900-TSO Battery Installation Airworthiness Approval**

STC NO. SA01005DE

E	Page 5	Added Textron (Cessna) models 177, 177A, 177B, 177RG, 180A, 180B, 180C, 180D, 180E, 180F, 180G, 180H, 180J, 180K, 182, 182A, 182B, 182C, 182D, 185, 185A, 185B, 185C, 185D, 185E, A185E, A185F to Section 4, Approved Model List.	See previous revision for signature	June 9, 2023
F	Page 6	Added Textron (Cessna) models 120, 140, 150, 150A, 150B, 150C, 175, 175A, 175B, & 175C to Section 4, Approved Model List.	See previous revision for signature	July 10, 2023
G	Page 6	Added Piper PA-12 Series, PA-18 Series, PA-20 Series, PA-22 Series, PA-24 Series, PA-32 Series to Section 4, Approved Model List.	See previous revision for signature	July 14, 2023
	Page 6	Added Cessna 180 from TCDS 5A6 to Item 6.		
	Page 6	Added Cessna P172D from TCDS 3A17 to Item 7.		
H	All	Reformatted footer with addition page number	<p align="center"><i>for</i> Gregory S. DiLibero Manager, West Certification Branch Compliance & Airworthiness Division Aircraft Certification Service</p> <p>Date: _____</p>	February 08, 2024
	Page 2	Added model specific limitation for Cub Crafters model CC19-180 in Section 2.2.		
	Page 7	Added Cub Crafters CC19-180, CC19-215, and Top Cub CC18-180, CC18-180A to Section 4, Approved Model List.		

FAA APPROVED MODEL LIST
ETX900-TSO Battery Installation Airworthiness Approval

STC NO. SA01005DE

2. Introduction

This document is the Federal Aviation Administration (FAA) Approved Model List (AML) for Supplemental Type Certificate (STC) Number SA01005DE, for installing the EarthX Inc. ETX900-TSO Battery into eligible aircraft.

Revisions to the AML must be coordinated between the STC holder and the responsible ACO Branch and require FAA approval. This AML is only applicable to the aircraft listed in paragraph 4.

2.1 Prerequisites

For a serial number of an approved model (see paragraph 4) to be eligible for this STC installation, certain equipment must be installed (See paragraph 2.2, limitation 1)

2.2 Limitations

Limitations - ALL models:

Limitation Number	Limitations for ALL models
1	To prevent battery overcharging, Over Voltage Protection (OVP) means/ equipment in the battery charging system is required.
2	The installer must determine if this design change is compatible with previously approved modifications.
3	The modified airplane must be maintained in accordance with the Instructions for Continued Airworthiness (ICA) document.
4	A copy of this certificate must be maintained as part of the permanent records for the modified aircraft.
5	If the holder agrees to permit another person to use this certificate, the holder shall give the other person written evidence of that permission.
6	Installation limited to 14 DC volts electrical systems.

Limitations - Model Specific:

Cub Crafters model CC19-180 airplanes certified in the Utility Category are not eligible for installation of the EarthX ETX900-TSO battery.

FAA APPROVED MODEL LIST
ETX900-TSO Battery Installation Airworthiness Approval

STC NO. SA01005DE

3. Certification Basis

The certification basis for each qualified model listed in paragraph 4 is as specified in its Type Certificate Datasheet (TCDS) and as modified by this STC's type design at the amendment levels noted in the appendix A.

4. Approved Model List

Item	Aircraft Make	Aircraft Model	TC Data Sheet	Certification Basis	Master Document List/Date	Instructions for Continued Airworthiness	Model Limitations	Notes	Initial Approval / Amendment Date
1	Cessna	182P	3A13	CAR part 3 with amendments as noted in Appendix A, Table 1.	EarthX Doc. No. D18120 Rev. B, dated April 8, 2021 or later FAA approved revision.	EarthX Doc. No. 180426 Rev. B, dated July 31, 2020 or later FAA approved revision.	See paragraph 2 for Limitations for all models and any Model Specific Limitations	None	Initial Approval April 8, 2021
2	Cessna	182E, 182F, 182G, 182H, 182J, 182K, 182L, 182M, 182N, 182Q to Serial Number 18265965.	3A13	CAR part 3 with amendments as noted in Appendix A, Table 1.	EarthX Doc. No. D18120 Rev. C, dated February 15, 2022 or later FAA approved revision.	EarthX Doc. No. 180426 Rev. C, dated September 11, 2021 or later FAA approved revision.	See paragraph 2 for Limitations for all models and any Model Specific Limitations	(1)	May 5, 2022/ August 1, 2022
3	Piper	PA-28-140, PA-28-150, PA-28-151, PA-28-160, PA-28-161, PA-28-180, PA-28-181, PA-28-201T, PA-28-235, PA-28-236, PA-28R-180, PA-28R-200, PA-28R-201, PA-28R-201T, PA-28RT-201, PA-28RT-201T, PA-28S-160, PA-28S-180	2A13	CAR part 3 with amendments as noted in Appendix C, Table 1.	EarthX Doc. No. D18120 Rev. D, dated March 17, 2022 or later FAA approved revision.	EarthX Doc. No. 180426 Rev. C, dated September 11, 2021 or later FAA approved revision.	See paragraph 2 for Limitations for all Models and any Model Specific Limitations	(1)	May 5, 2022
4	Mooney	M20 Series Models: M20E (SN 24-470 and on), M20F (SN: All), M20J (SN 0001-02999), M20K (SN: 0001-0999)	2A3	CAR part 3 with amendments as noted in Appendix A, Table 1.	EarthX Doc. No. D18120 Rev. E2, dated September 9, 2022 or later FAA approved revision.	EarthX Doc. No. 180426 Rev. C, dated September 11, 2021 or later FAA approved revision.	See paragraph 2 for Limitations for all Models and any Model Specific Limitations	(1)	September 29, 2022
5	Aviat	A-1 Series Models: A-1, A-1A, A-1B, A-1C-180, A-1C-200	A22NM	CAR part 3 with amendments as noted in Appendix A, Table 1.	EarthX Doc. No. D18120 Rev. F, dated September 18, 2022 or later FAA approved revision.	EarthX Doc. No. 180426 Rev. C, dated September 11, 2021 or later FAA approved revision.	See paragraph 2 for Limitations for all Models and any Model Specific Limitations	(1)	March 17, 2023

Appendix A: STC Certification Basis

All models shown in paragraph 4 fall within the STC’s certification basis shown below

Based on §§ 21.115 and 21.101, and the FAA policy for significant changes in FAA Order 8110.48, the certification basis is as follows:

- a. As determined by the Type Certificate Data Sheet (TCDS) for the aircraft for parts **not changed or not affected** by this STC.
- b. Regulations at the amendment levels listed in Table 1 below for parts **changed or affected** by the STC since the reference date of application, March 31, 2021.
- c. Means of Compliance Issue Paper, SE-1, dated January 9, 2020 approved and closed on January 28, 2020, Installation of Rechargeable Lithium Batteries and Battery Systems on Aircraft is applicable to this modification.

Special Conditions per IP Below	-

Issue Paper (IP) SE-1, date 1/9/2020 approved and closed on January, 28-20:

NOTE: For details on the IP Special Conditions below and MOC to the special conditions, review the Issue Paper outlined above

Special Conditions:

- (1) Maintain Safe Cell Temperature.
- (2) Prevent explosion or fire.
- (3) Prevent the occurrence of self-sustaining, uncontrolled increases in temperature or pressure.
- (4) Not emit explosive or toxic gases in hazardous quantities within the airplane either in normal operation or as a result of any failure.
- (5) Comply with the requirements of §23.863.
- (6) Escaped corrosive fluids or gases shall not damage surrounding structure or any adjacent systems, equipment, electrical wiring, or the airplane in such a way as to cause a major or more severe condition.
- (7) The maximum amount of heat resulting from a short circuit of the battery or internal cell, or any other failure, shall not have a hazardous effect on the aircraft structure or essential systems.
- (8) Rechargeable lithium battery installations must have a system to automatically control the charging rate of the battery to prevent battery overheating and overcharging and either:
 - i. A battery temperature sensing and over temperature warning system with a means for automatically disconnecting the battery from its charging source in the event of an over temperature condition, OR
 - ii. A battery failure sensing and warning system with a means for automatically disconnecting the battery from its charging source in the event of a battery failure.
- (9) Any rechargeable lithium battery installation, the function of which is required for safe operation of the aircraft, must incorporate a monitoring and warning feature that will provide an indication to the appropriate flight crew members whenever the safe of charge of the batteries has fallen below levels considered acceptable for dispatch of the aircraft.
- (10) The instructions for Continued Airworthiness (ICA) required by §23.1529 must contain maintenance requirements to assure that the battery has been sufficiently charged at appropriate intervals specified by the battery manufacturer and the equipment manufacturer that contain the rechargeable lithium battery or rechargeable lithium battery system. The lithium rechargeable batteries and lithium rechargeable battery system must not degrade below a specified ampere-hour levels sufficient to power aircraft systems. The ICA must also contain procedures for the maintenance of replacement batteries to prevent the installation of batteries that have degraded charge retention ability or other damage due to prolonged storage at a low state of charge. Replacement batteries must be of the same manufacturer and part number as approved by the FAA.
- (11) To show compliance to the proposed special conditions herein, paragraphs (1) through (10):
 - i. RTCA documents, “Minimum Operation Performance Standards for Rechargeable Lithium Battery Systems”, DO-311A, may be used for non-commuter category airplane installations.
 - ii. RTCA document, Certification Test Guidance for Small and Medium Rechargeable Lithium Batteries and Battery Systems, DO-347, may be used for commuter category airplane installations.
