Instructions for Switchbox Generator 25 03

Disclaimer: Use this Switchbox Generator at your own risk. This device contains electrical switches (Max Total Power 1800W), which activate and Power On/Off connected electrical devices. Text Messages control these connected devices, and sustain or interrupt continuous power to them. Improper operation can cause damage to the Device(s), Switchbox or User(s). Switchbox Control will not be held liable for any damage caused by this product.

NOTE: Switchbox must be activated upon first use, to begin using the product. Please take a picture showing the bottom of your unit (attached placard with sim serial #) and send to us at support@switchboxcontrol.com for activation. We will email you the unique phone # for your Switchbox once registration is complete.

Switchbox Ultra SIM Card

All Switchbox Ultra SIM accounts have unlimited text usage. Monthly charge for Switchbox Ultra SIM service is available on our website under Switchbox Ultra SIM credit and service. You can choose auto-pay to continue service uninterrupted, or manage the account yourself manually. If the sim card does not have an active account, Switchbox Ultra SIM will you give an additional 1-month grace period with a zero balance until the sim card is deactivated. If this occurs, visit our website to purchase a new Switchbox Ultra SIM account.

Operating Directions

1. Turn the generator unit ON with the circular power button on front of unit
2. Activate the internal Switchbox Control with the 12V ON/OFF button on back. You will know the Switchbox is powered inside when you see a white LED for the 12V ON/OFF button illuminated on the back panel, and a barrel circle icon on the front LED panel of the generator.
3. Activate the AC Outlets with the 'Switchbox Control' App on your Iphone, Ipad or Android device in the Apple or Google App Stores. Your default app password is 123456 and can be configured easily using the steps found in our setup video here https://youtu.be/k8sqvRxPn04
