## SPRUCE SPARS <br> - CAPSTRIP <br> STRINGERS

## GENERAL ORDERING INFORMATION

Aircraft spruce spars are available either S2S (surfaced 2 sides, top \& bottom, with rough edges in 4 " \& 6 " nominal width) or S4S (surfaced all 4 sides to thickness \& width). Prices in table below are for S4S spars. If S2S is desired so builder can trim to exact width, specify S2S and use 4" or 6" width prices from table. Request quote on spar widths wider than 6 ". Spars for certificated aircraft such as Aeronca, Stearman, Taylorcraft and Piper are available and may be priced from the table. Since many of these early aircraft were "handmade", the spars are often not uniform in size for a particular model. Therefore, the finished net dimensions should be specified when ordering replacement spars. Please price to nearest fraction.
Thousands of feet of S2S aircraft quality spruce are stocked in our Corona, CA. and Peachtree City, GA. warehouses. Orders for spars, spruce kits and capstrip can usually be shipped within three weeks after receipt of order. Spars wider than 6 " must be milled from 8 " specially selected stock which requires a long and indefinite lead time. Prices on request.
When ordering either spars or capstrip, designate the thickness first, then the width and length.
Examples: $3 / 4^{\prime \prime} \mathrm{T} \times 4-1 / 4^{\prime \prime} \mathrm{W} \times 14^{\prime} \mathrm{L}$ spar; $1 / 4^{\prime \prime} \mathrm{T} \times 1 / 2^{\prime \prime} \mathrm{W} \times 5{ }^{\prime} \mathrm{L}$ capstrip.
